First of all is air traffic control (ATC), as it stands there is no mention in the product description that ATC is missing from all the missions. In user reviews it is pointed out, that ATC is missing and the developer responded by writing own review and stating that ATC is impossible due to limitations of core game engine. It demonstrates that the developer clearly knows that most of users have an issue with ATC not being there and still did not put this critically important information in the product description what makes the product description simply misleading. The ATC either must have been patched out before releasing the DLC either the missions should have been designed in such a way that players would not need this feature and state this information in the product description.

Second, the mission compass is missing too. Currently this is mentioned in the product description and if ATC had worked, it would not be an issue. It is mentioned in the description that basically it could not be used for these high precision approaches. It leads me to the main issue: if game engine does not allow proper approach control, then what is the point of this DLC. Some of you might say that real pilots do not have mission markers or sometimes even ATC on these approaches, then I would ask where is the content worth of 16.99 EUR at full price? I could find using Google a dangerous airport and some flights that come in or out of it, program them into a flight plan in free flight mode and have mostly the same experience free of charge.

Good narration could reduce need for ATC, but again narration just is not good. The statements by narrator are very basic like "Take off when ready" or "Fly towards 13000 feet" and that is all she says. The narration is so quiet that I needed to change my sound settings to even hear it, when this problem does not exist in missions of the original game.

What you are left with is a vague text description of how you should fly this mission, which contains a runway number you are supposed to land on if you are lucky. No maps, which would describe the approach path and possibly could substitute missing ATC, mission compass and lackluster narration. The descriptions does not contain information on how long each scenario will take, so when going into a mission you can spend anywhere from 20 minutes up to 3 hours according to product description. At least these are missions, which generate rewards. However, this is a standard feature even for free user made mods available to download from the internet.

I really wanted to like this DLC, but it has a minimal amount of effort and content put into it. Almost every aspect you touch just falls apart. The developers instead of fixing the issues just explain why these cannot be fixed, but at the end of the day these explanations does not make the final product any better or worth more money. You could get the same experience with some Googling and free flight planner. Just do not buy this even if you think "if I don't like this, I will get a refund" since Steam's new refund policy covers only first 2 hours of play and some of the scenarios are longer than that. This leads me to the conclusion: do not buy this DLC, even on sale.

Survival horror aspiring to be like Alien Isolation or SOMA. To be honest: it is much better. I don't know how this game is not that popular. Ingame content is so very decent: sounds, texts, tons of readable-interactive items, realistic structures... i explore everything on my way and it really makes me go deeper and deeper in this game. Far of unknown is a constant feeling. Really unique setting and an awesome unexpectable plot.. I highly recommend this game to people who want to spend time on educational games.. Game doesn't work. Took ages to get through loading screen and kept freezing and crashing. Tried to play co-op and wouldn't let us play together. Comment boxes and error messages are in Russian, no help!. I love this game, one of my favorites.. i bought this dlc and didnt get 2500\$ it gave me 1500\$ still a great buy im just unhappy about not getting every thing.

. The puzzles are a nicely challenging, but the art is rather bad. Over all I would say it's not really worth it.. Horrible controls. Jerky movements.

Irrelevant title.

Seriously WHY IS THE MOUSE SET UP THIS WAY.

(Instead of having the gun aim where your mouse is, it aims counterintuitively. I don't know how to describe it in any other way besides stupid.)

Hailbrak posted the now infamous "I will kick your♥♥♥♥♥" auction on Ebay. It received nationwide (possibly international) attention, being mentioned on a number of comedy-news sources and radio stations. He was even unofficially portrayed on the Drew Carey show by none other than Henry Rollins - an episode in which Oswald hires someone from ebay to kick his♥♥♥♥♥

I also did a few ♥♥♥♥♥ radio interviews. They were ♥♥♥♥♥ because the smarmy morning show hosts and their sidekicks that laughed at everything they said were annoying and asked ♥♥♥♥♥ questions. And also because I had just woken up since they called me as early as they possibly could. If I remember right though, I got calls from New York, Los Angeles, Toronto, and Seattle. The LA guys were actually considering flying me out there to "kick someone's♥♥♥♥♥on the air", but I have no idea how that would've worked. I guess that's my 15 minutes of fame.

Updating for recent confirmation. Henry Rollins answers a good portion of fan mail through his website, so I recently sent him an e-mail to confirm this. He responded that his role of "Mr. Jericho" on the Drew Carey Show was in fact inspired by my auction, and that they showed it to him when he appeared on set.

This came full circle the other night, when I finally met Henry Rollins in person and got a picture of him kicking my♥♥♥♥♥ He was a good sport about it.

. Very hardcore game to pass level 1, it takes about 1 hour. But overall the game is fun and cool. My best/favourite VR experience yet!! (since getting my original DK1)

Why? It's full game with full controls, not a teleporting wave shooter. The Devs have basically let the player's decide what control system works for them.

Most movement thumbpad games make me sick pretty quickly. This game, once setup correctly for me doesn't. For me... full speed running using the touchpads, which I discovered works great as long I remove rotation from my thumbs. I setup left/right on the thumbpads for strafing. Once I got my control system figured out... I now have a full fun crazy duel wielding shooter with interesting environments to work through.

I'm writing this review after only playing 20 minutes, but I have put some hours into the VR First Encounter, which I also liked. This game is similar (obviously) to that, but the environments, graphics, and enemies are better in this one.

Oddly some of the chaos of the SS is reduced based on being able to use both hands to shoot in two directions (at two enemies) at once.

I bought the first game with full intentions of getting a refund if I wasn't enjoying it (re: getting sick, or simply not fun)... I almost did, until I played with the control settings. I'm glad I did. Now, the 2nd is out and it was a must buy for me.

THANK YOU devs for giving players control of their VR experience\controls.

I hope more developers realize that full motion VR shooters CAN WORK!

HIGHLY RECOMMENDED, if you can find a control scheme that works for you. I hope that you can. It's great!!

Happy gaming all.
