About This Game

Criminals are sent to atone for their sins in the ancient forest. Here they will be hunted down by a terrible monster, a sacrifice to appease the wrath of god. You were one of these exiles and just as in the stories the monster came for you. The last thing you remember is a blade coming right towards you. Opening your eyes you find yourself resting on a strange stone platform in the forest, all the wounds on your body and tears in your clothes gone. Lost and confused you begin to explore the world around you to discover the secrets behind the forest and your newfound immortality.

Experience atmospheric exploration gameplay on your journey through several breathtaking areas, from a vibrant forest to overgrown ruins and dark tunnels. Secrets await around every corner, waiting to be unearthed.

Master an engaging and challenging combat system, with many different weapons and strategies to explore.

Find fragments from the history of a broken world and reveal the truth behind the lost god and its legacy.

Title: Lost God
Genre: Action, Adventure, Indie
Developer:
Time Stop Interactive
Publisher:
Time Stop Interactive
Release Date: 7 Feb, 2018

a09c17d780

Minimum:

OS: Windows 7

Processor: Dual Core CPU 2.0 GHz

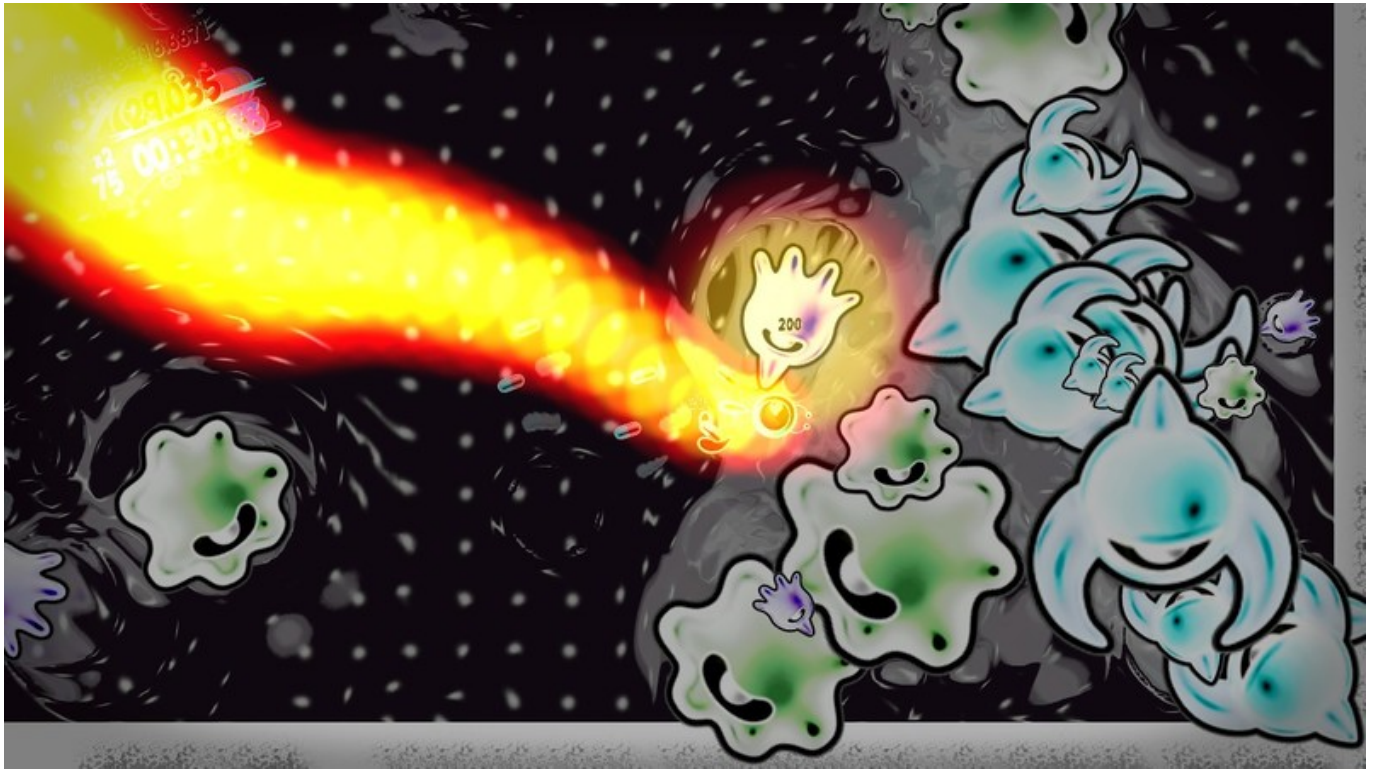

Memory: 4 GB RAM

Graphics: Nvidia Geforce GTX 750ti

DirectX: Version 9.0

Storage: 4 GB available space

@start was vey good but then it became boring :S. This game is pretty "meh". Nothing really stood out about this game to make me want to play it again in the future.. there's a bunch of golf games, cheap as well. none has susan inside. luckily.

its best idea? tag this as "Sports".. I had no idea this game was coming to Steam, but I'm glad its here. Installed it, and BAZA BAZA BOOM! Plays perfectly fine.. Overall, this is a decent indie project.

Great visuals, interesting mix of rpg, platformer, puzzle and combat. Aztec mythology is a fine add.

But, at the same time, it has some confusing technical issues and it is also a forgettable experience.. PROS:

Different hero-classes.

Enemy movement and classes vary.

Game mechanics.

Weapons deplete.

CONS:

20 minute game

Generic Soundtrack - not annoying - but nothing to remember either.

Graphics: mediocre.

Replayability is zero - once you're through you can erase it.

It might be randomized each time...butit doesn't seem that different.

. really not worth it

3 small islands you'll finish in 5mn each (and that's taking your time) and some loot you don't need (some of it look cool tho).

+Dragons

+Modern weapons

+Really nice if you find some peoople to play with

+Good graphics

-Should be in early access

-Not so much content

-May be buggy some times

-The way it introduces you to game modes and game overall.

Yet still you will have to try it yourself and test it as I'm not you and you might have better or worse experience.. I was one of the few lucky people to beta test this game.

Every bug I encountered was squished that night or the following day. Whilst working closely with Leth to fix bugs as they were encountered! (Read: Highly dedicated Dev team)

Gameplay: Similar to the first game, but heavily refined.

Non-linear, story line. 4 classes each entirely different from each other. Procedurally generated maps including world map and dungeon maps make every dungeon unique!

Sound: Incredible. Chris Christodoulou and Power-Up Audio did a fantastic job doing all the sounds and music in game which perfectly fits with what's happening on screen.

Controls: XBOX 360 Gamepad support as well as KB+M. Which

Story: Story was great. At no point was I ever wondering around confused what I should be doing.

All in all, 10/10 from me. Awesome game and well worth 14.99
I honestly can't speak highly enough for this game.. A nice add-on for flavor.

I really enjoyed this game!

It had wonderful characters and an interesting storyline, most importantly. I loved Melody's route and enjoyed Lyria's as well even though I didn't like her much at first. The CGs and backgrounds were beautiful, and I always love playing a GxG VN that's not based on the whole 'two timid schoolgirls discovering their feelings for each other and being embarrassed because they're both girls' idea. There are definitely some games that have pulled that off really well, but I usually find fantasy/sci-fi/etc. based GxG games much more charming.

The game was great overall, but just as a personal preference thing, I think a different font would have fit better, and polishing the sprites a bit more would have been great. Aside from that, I think it was lovely and well worth the money! It's got a great length for the price, and I'm definitely looking forward to future games from the developers.. A set of four equally nice, neatly made (in every aspect) time managers. Slightly diversified (with new game play features, bonuses and surprises) to make each game a bit different, while keeping enough in common with the previous one(s), which shortens waste of time and nerve on mastering the next game, that's valuable. Repetative, yet it feels all right here, can't remember myself being driven into bore even once. I beat all four games 100% on expert difficulty and still wouldn't mind to see the fifth. Taken into account the fact that games like these are not my idea of fun (or they weren't at least))) - what better recommendation could i give to a game. If you are looking for a highly involving and entertaining, not all that hard yet challenging enough game - check this one. Probably you will be pleased even beyond your expectations.

Another great addition for every point & click adventurer's library!

All of the characters are memorable and interesting, there are some really cute and funny dialogues and monologues, some of the puzzles are pretty straightforward and some others are a bit harder, the art style is perfect, the music is nice, and there are zero bugs. Now, let's just hope we'll get the rest of the episodes, because I really dislike incomplete stories. Till next time, just keep pointing & clicking.. I just finished my first ending and really enjoyed it so far. The story is nothing special for a visual novel, but very entertaining. You can choose your daily routine (earn some money, buy a present) and meet your favourite Character.

Furthermore, you have to play a liquor mini-game. It's like a memory game with different levels of difficulty. If you win, you can increase the affection of the girls. Besides, the player has to find out all the information of the characters through the right questions. There is a high replay value because of the different endings and the beautiful Art Style of Sayori. If you love a mix between Nekopara and honeypop, you will enjoy this game.

You shouldn't expect a great depth of the story, but it's a decent game :)

+Sayori Artwork <3
+High Replay Value
+Decide Your own daily routine

- not much depth. The story is nice 8/10

The music fits in the areas so 10/10

The characters are all different and funny in their own ways 9/10

This game seems to be for girls but really is for all sexes

overall this game is a 9.75/10. This version fixes some of the issues from the original - you start with more chars and they all have more abilities. However it is basically the same game but with worse camera issues.

I could not bring myself to keep playing it because of the camera issues. Everytime I selected a new character, the camera would zoom in, turn, and tilt. This makes it really annoying to "pause" and start telling each team member what to do during combat.

It also removed the ability to move around and look at places your chars are not standing. So basically it was the camera that drove me nuts after an hour that I decided it was not worth my time.

It is a good game, funny game, and interesting if you like comic book style stuff ~ however you need to like micro RTS with 2-3 units and bad camera issues to really get a good play out of it.. this is my life now
